Authorization for this examiner's amendment was given in a telephone interview with Neil Feltham on January 31, 2005.

3. The following is an examiner's statement of reasons for allowance:

The prior art does not disclose nor suggest making a gradient (graded increase or decrease in thickness per unit distance from the substrate surface) polyethylene glycol alkyl acrylate film on a substrate by the process steps of claims 1, 30 or 32.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because

- a) chemical formula and structures in Figures 2 and 4 are either too small to be legible, or are illegible for other reasons (overlapping symbols);
- b) Figures 8 and 9 are too dark; the interior formula of Figure 8 is partly illegible.

Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.
